I. INTRODUCTION  

A. It is important for an individual to understand the history of terrorism and how its roots evolved into what we are witnessing in our modern times. From the Zealots and Assassins to our current threats from Al Qaeda and ISIS. The French Revolution marked a turning point in the history of terrorism. The revolution gave birth to the term “terror” or what some might call state-terrorism. The Russian revolutionary more than a century later helped develop the early stages of terrorism in countries such as: France, Italy, the Balkans, Armenia and India. This was considered the “Golden Age” of terrorism. Years later, World War II marked a strategic break with the past and changed everything, among other things transforming terrorism into an instrument of resistance. World War II represented the end of mass warfare and the evolution of a nuclear strategy that created the emergence of limited warfare. In the last century, four years stand out as turning points in terrorism and its effect on history: 1968, 1979, 1983, and 2001. The 11 September 2001, terrorist attack was the major turning point for the global fight on terrorism. Over the last two decades the United States and its allies have led the fight on Islamic terrorism. The two greatest threats Al Qaeda and ISIS have been reduced to a fraction of what they were. This does not mean that the war is over, as new groups continue to form under religious and political motives. Understanding terrorism and its history is vital to developing a strategy to defeat and deter these acts globally. This course will give you the insight of the historical aspects of terrorism and how it has developed into what we are witnessing in our modern times.
